

Membership fee

The activities of the network are possible mostly thanks to financial support from various professional organizations, public institutions and private sponsors, as well as voluntary work from the various teams.

Membership fees, paid by the 'active' network members constitute an additional resource for the network. They are mainly used to finance contributions for travel costs of teams who take part in the different activities (project spaces, symposia, etc.). They are not used to pay overhead costs of the organization.

Special support membership fee: 49 Euro for two years
