A European architectural project

Since June 2004 the ever-growing architectural travelling exhibition is touring through nine European countries. In each country 11 teams from the hosting country are joining. After the stations in Bratislava (Slovakia), Prague (Czech Republic), Berlin (Germany), Amsterdam (Holland), Paris (France), Venice (Italy) and Zagreb (Croatia). Ljubljana is the 8th station of the tour and together with the 11 initial Austrian teams there are now **99 architectural teams** that will present excerpts of their work from March 11th on at the Maximarket Passage. In **June 2006** the exhibition will return to it's origin with than **99 European architecture teams**.

Wonderland began with the presentation of the current works of eleven selected architectural teams by means of a specially developed exhibition landscape. It consists of 440 quadratic information carriers made from hardboard plates from the company Funder. They are called

pixels. The success of the exhibition in Austria prompted the continuation of the project in the form of a European tour. Eleven young teams each were invited from eight other countries (Slovakia, Czech Republic, Germany, Netherlands, France, Italy, Slovenia, Croatia) to perform together on the Wonderland landscape and to present their individual current work.

The total number of pixels remains the same during the entire tour while the number of teams increases with each country. Therefore the shared territory has to be divided: in Bratislava for example each of the 22 teams had 20 pixels, in Ljubljana each of the 99 teams will present itself on only four pixels. There is a growing need for the teams to focus on the substantial parts of their work.

On March 11th the Exhibition opening will be followed by the workshops that are a part of the WONDERLAND tour concept. The issue at this time will be "Positions". The workshops will be held at the Mestni Muzej at 10:00h
