A European architectural project

Since June 2004 the ever-growing architectural travelling exhibition is touring through nine European countries. In each country 11 teams from the hosting country are joining. After the stations in Bratislava (Slovakia), Prague (Czech Republic), Berlin (Germany), Amsterdam (Holland), Paris (France) and Venice (Italy), Zagreb is now the 7th station of the tour and together with the 11 initial Austrian teams there are already 88 architectural teams that will present excerpts of their work from January 13th on at the DOM HDLU. In **June 2006** the exhibition will return to it's origin with than **99 European architecture teams**.

Wonderland began with the presentation of the current works of eleven selected architectural teams by means of a specially developed exhibition landscape. It consists of 440 quadratic information carriers made from hardboard plates from the company Funder. They are called pixels. The success of the exhibition in Austria prompted the continuation of the project in the form of a European tour. Eleven young teams each were invited from eight other countries (Slovakia, Czech Republic, Germany, Netherlands, France, Italy, Slovenia, Croatia) to perform together on the Wonderland landscape and to present their individual current work.

WL Exhibition location: Dom HDLU, Zagreb Pic: E. Leitner

The total number of pixels remains the same during the entire tour while the number of teams increases with each country. Therefore the shared territory has to be divided: in Bratislava for example each of the 22 teams had 20 pixels, in Ljubljana each of the 99 teams will present itself on only four pixels. There is a growing need for the teams to focus on the substantial parts of their work.

CIRCUMSTANCES [Relevant for the architectural production of Croatia]

As an additional benefit for the network development and - communication accompanying workshops and open dialogues are organized to cover and discuss exciting topics relevant to the European architecture scene.

The workshop in Zagreb is titled Circumstances. These circumstances, though many product of a long and still present difficult transition, have local manifestations and unintended consequences that find generic reading as well, therefore subject of discussion from different points of view.

The workshop opens the possibility to debate about the pressing need of finding the necessary strategies in our profession to overcome some of the basic handicaps of such transitional circumstances.

Three key speakers from different backgrounds are going to introduce their distinctive understanding of the Circumstances with the hope that their viewpoints will provoke an active response and a dialogue between the participants. The personal discourses will be presented by: Maroje Mrduljaš, architect and art/architecture critic from Zagreb; Helena Paver Njirić, architect from Zagreb with a broad international carrier and Branimir Medić, architect, one of the partners of de Architecten Cie in Amsterdam that practices also in Zagreb.

Among many topics that might occur, the intention is to pose the questions as:

If the legislation is one of the main interfaces between investors and architects, what would be an instrumental reading of the normative to perform better solutions? How to improve some of its aspects?

How to find real dialogue with small entrepreneurs, investors and the corporate culture in general? What is the role of the Architect in such conditions?
