New Shopping Mall and Housing Vævet I Hillerød

Hillerød, Denmark, project
In collaboration with Bornak
Arkitekter

The project is located in the south-western part of Hillerød. This part of the city is characterized by contrasts: the built city and the landscape, the small scale of the housing areas and the larger scale of the industrial areas... the existing and the vision of the future development. This project provides a "crystallization point" to connect and relate urban and natural landscapes.

Section Taurea

New Bull Fight Arena
Pinto, Madrid, competition entry
In collaboration with María
Gomez-Guillamon and
Vicki Thake

... A las cinco de la tarde.
Eran las cinco en punto de la tarde ...
In the proposal, it is the circulation of the public that defines the form of the building, a spiral movement toward the center, leading into and, in opposite direction, out of the building. This movement evokes the gesture of the bullfighter, when bull and bullfighter in circular movements search/meet each other.

PATIO HUSET - Housing in Vanløse

Copenhagen. Project.
In collaboration with Bornak Arkitekter

In the new construction, we kept the existing perimeter walls, bringing them to new life through private yards of a semidetached/patio typology on two levels.
The spaces are divided in public, communal, and private with the boundaries between them at the same time defined and dissolved.
